

Installation Instructions

Series 900 Yamaha Full Dash-Model G14, G16, G19 and GMAX

1. Remove steering wheel
2. Remove entire center cupholder section. Disconnect wiring and remove all switches, gauges and indicator lights from unit and discard.
3. Remove rubber bumpers from left and right side of the glove box area and discard.
4. Pull back the rubber floor mat.
5. Prepare dash for installation by locating and cutting all openings required for all switches, gauges and indicator lights.
6. Install all switches, gauges and indicator lights as required.
7. Mount dash to face of factory instrument panel under rubber cowl trim behind mounting bolts.
8. Attach dash to instrument panel using included screws. Install 4 screws at the very top of dash and 4 screws on the very bottom surface below the door openings.
9. Cut approximately 1" off of the top of rubber floor mat and place mat over bottom of dash to cover screws.
10. Congratulations! You have just installed one of the finest custom golf car dashes in the world! We hope you experience many years of enjoyment!
